

H.C. Andersen Paper Cuts

When visiting the citizens of Copenhagen, Danish mansion houses, and royal and princely houses in Europe, H.C. Andersen cut his imaginative and narrative paper cuts. Often together with the children of the house who were given the cuts as a present and as a memory of a great artist and a unique story-teller.

On the occasion of the H.C. Andersen-year, Fiona, the wallpaper factory, has produced a wall covering with one of the many decorative paper cuts made by the famous Danish poet.

The wall covering has been printed in the traditional and beautiful surface print technique on a substrate of felt, which gives it an almost hand-printed appearance, quite in the spirit of H.C. Andersen.

The pattern is available in three colours. An off-white printed with dark grey pattern, a dusty green, and a subdued beige. Colours as well as quality have been adapted to Fiona's collection "Wall-hess Wild Life". To each of the 3 colour combinations it is therefore possible to find matching sidewalls.

For instance you may apply one length with the H.C. Andersen pattern and combine it with a uni wallpaper on the rest of the wall.

Another possibility is to apply the pattern horizontally, as a border, either at the floor or further up on the wall, suiting furniture and other decoration. The possibilities are innumerable.

The pictures show these combinations:

White / grey	H.C. Andersen 250601 combined with Wild Life 250010
Green	H.C. Andersen 250602 combined with Wild Life 250041
Beige	H.C. Andersen 250603 combined with Wild Life 250031

New easy hanging

The wall coverings are manufactured on a non-woven felt.

Besides providing a beautiful surface it means that the wall coverings can be hung in the same way

as felt and glass tissue, i.e. by rolling the adhesive on the wall.

It is not necessary to apply the adhesive on the reverse and leave the wallpaper to soak. The lengths will neither extend nor shrink and can therefore be applied directly on the wall, which makes it both easier and quicker to decorate the walls.
